

Advanced Nutrients

Sensi Professional Series

The only water-soluble powders made for your specific crops that Hit the Shift between the grow and bloom phase to improve potency, yields, and enabe your crops to reach their true genetic potential.

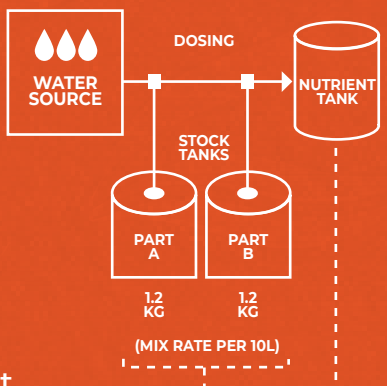
The European Market will benefit from 500g, 1kg, 5kg, and 10kg sized bags of Sensi Grow & Bloom Water-Soluble Powder made of moisture-resistant material, catering to the needs of every type of grower and maintaining the chemical stability of the fertilizer's best-in-class inputs.

Now available and compliant in the whole European Union.

Available sizes

STOCK TANK MIXING : THE 1.2KG METHOD

- Follow the dosage on the feeding chart.
- For optimal dissolution, dissolve in warm water.
- For better results, let the solution cool down to room temperature before feeding to your plants.
- This is a 2-part fertilizer. We recommend using both part A and part B together for best result.
- Never mix multiple products together in concentrated form.
- Use reverse osmosis (RO) or distilled water for all stock tank concentrate mixes.
- Store in a dry place.



SET DOSER TO		EC
