

GENESIS FORMULA

COCO A+B

FEED CHART

For Chilli's, Pepper's and Tomatoes

FOR SEEDLINGS & CUTTINGS

5ML COCO A + 5ML COCO B
WILL GIVE AN EC READING OF 0.3

WEEK	1	2	3	4	5	6	7	8	9	10	11	12		
PERIODS	VEGETATIVE <small>Set pH 5.4 let swing to 6.6</small>			FLOWERS & FRUITING <small>Set pH 5.9 let swing to 6.4</small>								FLUSH		
COCO A	10	13	16	20	23	26	30	30	30	30	23			
COCO B	10	13	16	20	23	26	30	30	30	30	23			
SOFT WATER EC START - 0	0.6	0.8	1.0	1.2	1.4	1.6	1.8	1.8	1.8	1.8	1.4			
HARD WATER EC START - 0.6	1.2	1.4	1.6	1.8	2.0	2.2	2.4	2.4	2.4	2.4	2.0			
ADDITIVES	<i>All measurements for Coco parts A+B are in ml. mixed into 10L of water</i>													
LIQUID SAND	-	10	10	15	15	20	20	20	25	25	25			
PRO-TECT	-	5	5	5	5	5	7	7	7	7	7			
P/K PLUS	-	-	-	-	-	-	-	10	20	30	30			
HYGROZYME	-	10	20	20	20	10	10	10	10	10	10			

When using additives we recommend that you take an accurate EC measurement of your nutrient solution before feeding your plants.

All measurements for additive solutions are in ml. mixed into 10L. of water. When using additives in your nutrient solution, start with water, add your additives first then add your nutrients.

IMPORTANT PLANTS TAKE UP DIFFERENT MINERALS AND NUTRIENTS AT CERTAIN PH RANGES. TO GET THE MOST OUT OF YOUR FERTILISER AND PLANTS SET YOUR PH TO PH 5.6 AND LET IT RISE THROUGH THE RANGES UNTIL YOUR NEXT WATER CHANGE.

GENESIS FORMULA

XIWI
ITUP

ADDITIVES

LIQUID SAND A Potassium - Silicate Supplement that enhances cell structure and plant development, resulting in broader, thicker, leaves; increasing photosynthesis. It boosts plants immune system as well as enables the root system to withstand higher temperatures and drought.

PK PLUS Increase your plants fruit production with this unique PK stimulant. Genesis Formula PK Plus is a new type of additive that is both a Booster and a late flowering enhancer. Use within the Genesis feeding program to push your plants performance through the roof, with harder, denser, sweeter fruits that taste great.

PRO-TECT is an essential vitality additive that encourages root development and helps maintain a dense, healthy rooting system. Expect rapid root growth and the prevention of root rot; this increases the resilience and overall health across the entire plant. Pro-Tect is a 100% organic formulation and can be used throughout the entire grow cycle, either within the feed or applied as a foliar spray.

HYGROZYME Healthy plants grow bigger, stronger, and faster than unhealthy plants. Clean grow media foster the healthy growth of plants. Hygrozyme helps keeping things clean. When the environment is clean the plant has few competitors for food and oxygen and therefore less stress. Since Hygrozyme aids in the conversion of dead matter into useable plant energy, the plant has a greater and more readily available food supply. The common result of a healthy plant with more food and less stress is root expansion. Greater root mass yields greater top growth.
